EDUCATION

Bachelor in computer science
Bar-Ilan University,
Ramat-Gan
GPA: 82
Oct 2022 – Sep 2026

RELEVANT SKILLS

- object oriented programming (OOP)
- Design patterns
- Data structures and Algorithms
- C, Python, Java, assembly, C++, JS, NodeJs, Bash, Ocaml
- MongoDB, MySQL, NoSQL

PROFILE

Motivated third-year Computer Science student passionate about low-level programming, firmware, backend systems, and machine learning. Skilled in applying theory to practical projects and seeking an internship to contribute to scalable, impactful solutions. Quick learner, problem-solver, and committed to delivering optimized software in dynamic environments.

PROJECTS

CNN Self-Organizing Map (SOM)

- **Description:** Developed a Self-Organizing Map (SOM) to classify and visualize the MNIST dataset of handwritten digits.
- **Demonstrated Skills:** Python, neural networks, data visualization, machine learning, MNIST dataset.

Multi-Threaded News App

- **Description:** Simulated an OS environment with multithreading, synchronization, and inter-process communication.
- **Demonstrated Skills:** C programming, multithreading, IPC, synchronization, resource management.

FakeBook App

- **Description:** Built a Facebook mock up with React, Node.js, MongoDB, and Android Studio for full-stack functionality.
- **Demonstrated Skills:** Full-stack development, React, Node.js, MongoDB, Android Studio.

Directory Copy Library in C

- **Description:** Created a library on Linux to replicate Python's shutil.copytree, enabling directory tree copying with advanced file handling.
- **Demonstrated Skills:** C programming, Linux, file I/O, symbolic link handling, library

PROFESSIONAL EXPERIENCE

Teacher Assistant
Oct 2022 – Sep 2023

Bar Ilan and Tel Aviv University

- Develop customized lesson plans based on the specific psychometric test and the student's needs. Start each bullet point with a verb to show what actions you took at work
- Conduct one-on-one tutoring sessions, focusing on areas such as verbal reasoning, numerical reasoning, logical reasoning, and other relevant psychometric test sections.

NOTABLE ACHIVEMENTS AND COURSES

- Advanced Programming: 96
- Computational Models: 92
- Probability: 92
- Advanced Algorithms: 82
- Linear Algebra 2: 90
- Psychometric test: 709
- Won Second Place In Creating and Optimizing matrix multiplication contest, using Cache Optimization and implementing Karatsuba algorithm.
